PROJECTS

MYBARCART

Provides cocktail recipes based on ingredients that the user already owns. Front end is built in react, back end is ruby on rails and postgres.

MYUSUAL

Full-stack web application built using Auth0, MongoDB, and Express. This app allows users to share personal lists with other users.

CHUCK NORRIS JOKE GENERATOR

Full-Stack web application built using MongoDB and Express. This app generates random Chuck Norris jokes.

EXPERIENCE

FRONT END DEVELOPER | FJORD | MAR 2017 - PRESENT

- Created prototypes for USPS and Toyota (React)
- Developed a website for USPS employees to assist them in locating packages (React/Flux). The success of this project was monumental for our client and lead to further work.
- Collaborated with other developers, both front and back end, as well as designers, to produce a dashboard for drilling engineers to plan and estimate the cost of drilling a well based on historical data (React/Redux)
- Demoed sprint progress to clients and executives

CUSTOMER SUPPORT SUPERVISOR | HOMEAWAY | MAR 2015 - SEPT 2016

- Managed a team of 11-14 employees, performing quality audits and delivering metrics
- Provided floor-wide guidance and support
- Scheduled tasks for CS Leadership Team
- Collaborated on roll-out plan for metrics dashboard

CUSTOMER SUPPORT REP | HOMEAWAY | OCT 2013 - MAR 2015

- Assisted customers on all devices and operating systems
- Aided escalated customers as part of Resolutions Team
- Retained high marks in customer satisfaction, call handle time, and cases closed
